JUSTIFICATION:

Prior to the hunt, a quota of 26 bull moose that do not conform with the general season antler restrictions was established for the Copper Basin Community Subsistence Harvest Hunt (CM300) in Game Management Unit 13E. The quota in Unit 13E, based on sustainable harvest principles and current population estimates, has been reached.

Copper Basin community moose hunters may still hunt in subunit 13E through the end of the regularly scheduled season (September 20), however all bulls taken beginning Friday, August 26, with a community harvest ticket must conform to the general hunt antler restrictions (spike-fork antlers or 50-inch antlers or antlers with four or more brow tines on one side).

The Board of Game allocated up to 100 moose that do not conform to general season antler restrictions to the Copper Basin Community Subsistence Harvest Hunt. The cumulative total for quotas for the 2016-17 season is 100 moose. The following table lists the quotas for each hunt area and the general season antler restrictions.

This emergency order changes only the bag limit in Unit 13E. Bulls that do not meet the general season antler restrictions can still be taken in the remaining subunits of Unit 13, per the table below. All other state hunting regulations still apply, including the closure of the take of all big game in the Paxson Closed Area.

CM300 Quota of Bulls That Do Not Meet General Season Requirements	Hunt Area	General Season Antler Restriction for all other resident hunters
0	Open portion of GMU 12	Spike/fork, or 50" antlers, or 4 or more brow tines
